Kuching – Leading local concrete products manufacturer, Poh Yong Tiles Industries Sdn Bhd (PYT) today announced the award of ISO 9001: 2000 certification for its concrete piles known as “**PY Pile**”.

The certification adds **PY Piles** to the vast range of ISO 9001:2000 certified products manufactured by PYT.

“This is another feather in the cap for PYT and evidence of our innovation and determination to provide the concrete products needed by the building industry at the best standards,” said PYT Assistant General Manager Thomas Wong.

ISO certification began with PYT’s legendary Poh Kwong 88 (PK 88) concrete interlocking roof tiles which have adorned more roofs in Kuching than any other roofing product.

This followed with the EVER brand of Concrete Paving Blocks, Hollow Blocks, Cement Bricks and Road Kerbs. These products obtained similar ISO accreditation in 2002.

PY Piles are Pre-cast Reinforced Concrete Square Piles which come in a range of sizes including 150mm, 175mm, 200mm & 250mm sizes with lengths up to 12m.

PY not only manufactures and delivers the piles to site, but can also provide pile driving thus ensuring a complete, fully integrated and worry-free service for construction industry customers.

“Call us and I’m sure you will find our pricing is hard to beat,” adds Mr Wong.

PY Piles are manufactured to MS 1314: 2004 standards and have been approved by Lloyd’s Register Quality Assurance (LRQA) to the Quality Management System standards: ISO 9001: 2000 and MS ISO 9001: 2000 and are accredited by United Kingdom Accreditation Service (UKAS).

“It is always rewarding to obtain an internationally recognised and acclaimed quality management standard such as ISO 9001: 2000 as it proves we are a world class business and we aim to provide world class service to our customers,” said Mr Wong.

PYT began its business in the 1970s and since then has been constantly keeping abreast of the needs of the local building industry. Its research and development team is continuously involved in developing new product lines.

“Innovation is essential in every business. While we are fortunate to be well-established with our PK88 concrete roof tiles and Ever range, we are not resting on our laurels.

“To remain competitive and grow our business, we have to produce exciting new products to suit the increasingly sophisticated demands of our customers,” he added.

The very latest addition to PYT's concrete products range is EVERPAVE's TURFSTONES. A landscaper's dream, these hollow pavers allow grass to grow while providing the necessary structural strength for most traffic situations.

"Turfstones are a wonderful way to bring a touch of nature back to the concrete jungles that we live in," commented Mr Wong.

"They are particularly recommended for car parks and driveways for erosion control and for soil stabilization to slopes, embankments and reservoirs," he added.

Besides being practical, they are aesthetically appealing and cool down car parks. By being permeable, they also allow more natural drainage, hence less run-off problems.

This wonderful product has dimensions of 337.5 x 225 x 80mm thickness, coverage of 13.3 pcs per m² and each paver weighs 9kgs.

"Another great bonus is that the Everpave Turfstones are designed to interlock perfectly with the Everpave range of paving blocks creating an integrated solution for all paving needs," said Mr Wong.

"Do call us or visit our office where we can assist with finding the right product for your needs. You can be assured of the most competitive pricing," he added.

"We are very grateful for the ongoing support of all our valued customers and we always look forward to being of service to them as well as to introducing our products to new customers," said Mr Wong.

PYT's comprehensive range of quality concrete products can be viewed at its showroom at Lot 1006, Jalan Kwong Lee Bank. 93450 Kuching.

PYT Sales staff can be contacted on Tel:082 488800 or Fax: 082 336000 or you can visit the PYT website at www.pohyong.com.my.

END
